## SUMMARY

4 years of experience in development and operations in various industries, collaborating with high-performing teams to achieve productivity increases of up to 10%, creating powerful dashboards, enhancing user experience and engagement by 15%, and streamlining business processes.

## TECHNICAL SKILLS

React, React Native, Next.js, Python, Ruby, Flask, Django, Redux, JavaScript, Tailwind, Git, CSS, SQL, AWS

---

## PROJECTS

### FriendZone

June 2023

Facebook clone where users can post and interact with others.

[Live](#) | [GitHub](#)

- Collaborative project employing contemporary development approaches such as agile methodology and incorporating the widely adopted tools React, Flask, and AWS S3 to craft a user-friendly application.
- Developed the social feed feature to closely align with Facebook's design, empowering users to create, edit, delete, and comment on posts.

### Zesty

July 2023

Etsy clone where users can purchase items and create listings.

[Live](#) | [GitHub](#)

- Developed secure user authentication using BCrypt hashing in Python backend with React auth routes for enhanced security.
- Engineered the database, back-end routes, and front-end layout for the application.

### Tripbnb

May 2023

Airbnb soft clone where users can book, review, and manage spot listings

[Live](#) | [GitHub](#)

- Employing React, Node, Express, and Sequelize, I prioritized an impeccable UI design that harnessed the potential of Flexbox and Grid to ensure a sleek layout.
  - Enabled users to view, review, book, and manage listings through a listings page for a comprehensive user experience.
- 

## WORK EXPERIENCE

### Full Stack Developer

Aug 2023 – Present

CUBESEED AFRICA, Lagos, Nigeria

- Developed and implemented the Next.js and Django-based marketplace, enhancing user experience and streamlining business processes.
- Contributed to the creation of a powerful dashboard enabling users to enter the agricultural industry, plan production strategies, attract investors, and bypass intermediaries.

### React Native Developer

May 2022 – Feb 2023

LiveStockCity, Mount Solon, Virginia

- Collaborated with the back-end team to seamlessly integrate user sign-up, login, and social feed functionality.
- Developed features within the social feed that allow users to like and comment on posts, enhancing user engagement by 15%, and fostering a vibrant and engaging social media experience within the app.

### Amazon Warehouse Ambassador

Sep 2014 – Sep 2018

Amazon, Newark, CA

- Led a high-performing team that achieved a remarkable 10% increase in productivity through seamless and prompt delivery of customer packages.
  - Exemplary collaboration with managers to efficiently process packages, supervise workers, and maintain exceptional quality standards, while promptly addressing operational challenges or issues.
-
